

WORK EXPERIENCE

System Programmer

Database Technical Services - TD Bank

June 2021 – Present Remote

- Maintained IMS database and transaction manager using **System Modification Program/Extended (SMP/E)** to support the environment for Host-Operations and Application Developers
- Migrated legacy **Excel (VB.NET)** statistical dashboard to **Jupyter Notebook** using **Python (Pandas)** reducing processing-time from over **20 minutes** to **3 seconds**
- Integrated **Splunk Automated Alerting** system with **z/OS MVS System Log** to monitor critical system errors and security threats in real-time
- Modernized project management system and documentation by creating a team **JIRA** and **Confluence** wiki as group administrator

System Support Analyst

Information Technology - Canadian Solar

Dec. 2020 – June 2021 Remote

- Developed **Excel (VB.NET)** applications to support Portfolio Analysts drafting financial projections for newly proposed solar energy power stations in South America
- Configured **Power Automate** workflow to create support tickets and archive emails when triggered using **Power Apps** form logic

Business System Analyst Intern

Project Management Enablement - TD Bank

May 2020 – Aug. 2020 Remote

- Automated 6 hours of manual reporting using **Alteryx** workflows to produce financial forecasts for Project Analysts across teams
- Created **Tableau** dashboard analytics for month-end financial and spending reports

Information Security Analyst Intern

Payment Card Security Team - TD Bank

Sept. 2019 – Dec. 2019 Toronto, Ontario

- Developed **SharePoint** portal to create a **PCI DSS** intake workflow tool and evidence repository
- Identified a bug in LMS training modules during first week of work, resulting in Manager reporting issue to software vendor
- Attended consultation meetings for projects that provided **PCI DSS** security reviews across TD Bank
- Deployed **Tableau** dashboard analytics for the **Payment Card Security Team's** SharePoint portal
